Quotation for a Laboratory Modular Dispersing System: Labor Pilot 2000/4 with 3 HP motor

(For inline, continuous or recirculating operation, up to 42 psi)

Technical description
Labor Pilot Specifications
<ul style="list-style-type: none"> • 3HP 230/460 V, 3PH TEFC Non Ex-Proof motor , painted gray • Poly-V belt drive enclosed in a stainless steel base frame • High speed precision bearings enclosed in a stainless steel lantern • All wetted parts are made of 316 stainless steel • Shaft seal is made of a high performance PTFE compound • Sanitary clamp connections, 1" inlet, ¾" outlet

	Price ea.	Qty
Labor-Pilot 2000/4 – HED – Single Stage Moderate shear;	\$8,995.00	
Single Stage moderate shear dispersing machine, IKA HED has a standard tip speed of 23 m/s. Nominal flow rate is 12 GPM.		

Labor-Pilot 2000/4 – UTL – Single Stage High Shear;	\$8,995.00	
Single-stage high shear dispersing machine, IKA Ultra Turrax® (UTL). One generator (Medium – 4M). Standard tip speed of 23 m/s; nominal flow rate is 1.5 GPM. The generator can be easily changed to meet the needs of most applications.		
Additional Generators available; 2P, 2G, 4M, 6F, 8SF	\$947.00 ea.	

Labor-Pilot 2000/4 – DR – Multiple Stage Ultra Shear;	\$10,495.00	
Three-stage Ultra Shear dispersing machine, IKA Dispax Reactor® (DR). Three generators (Coarse 2G - Medium 4M – Fine 6F) are arranged in series for optimum performance and functionality. Standard tip speed of 23 m/s; nominal flow rate is 1.5 GPM. The generators can be easily changed to meet the needs of most applications.		
Additional Generators available; 2P, 2G, 4M, 6F, 8SF	\$947.00 ea.	

Labor-Pilot 2000/4 – MK – High Shear Colloid Mill	\$13,995.00	
Colloid mill with adjustable milling gap, that is used for wet milling slurries and/ or colloidal solutions. Maximum flow rate is up to 2 GPM.		

Labor Pilot Shear Package; Includes all above modules;	\$15,445.00
